**The Best Code Reviewer of the Month**

## Profile

Developing applications in JavaScript, React, Frameworks, PostgreSQL, and Ruby on Rails is a passion as a full stack developer. Knowledgeable in technology and writing code to create databases, set up backend, and design frontend systems that are reliable and user-friendly. A confident communicator, strategic thinker, and innovative creator, developing customized software to meet organizational needs, highlight core competencies, and further success. Over 1+ years of experience in designing, developing, and deploying web applications, with the ability to work independently and as part of a team to deliver high-quality software on time and within budget.

## Work Experience

- Mar 2023- Present  
 Microverse | San Francisco, CA, US  
**MENTOR / CODE REVIEWER (Remote)**  
 Mentored over 20 junior web developers, providing technical support through code reviews and feedback sessions. Provided advice and tips on how to maintain motivation and productivity and satisfaction rate among mentees. Effective communication for feedback and suggestions to the development team.
- 2021 - 2023  
 Green Acres Landscape | Dubai, UAE  
**Sales Service Engineer**  
 Spearheaded a comprehensive review of operational processes and identified key inefficiencies, resulting in the implementation of streamlined workflows that improved overall productivity by 30%. Introduced innovative scheduling and logistics systems, reducing project completion times by 20%. Successfully managed a budget of AED 5 million, consistently delivering projects within budget constraints.
- 2018 - 2021  
 HM Garden Center LLC | Dubai, UAE  
**Agri Sales Engineer**  
 Implemented cost-effective logistics solutions, resulting in a 10% reduction in transportation expenses and timely delivery to clients. Successfully navigated government procurement processes, ensuring timely submissions and compliance with regulatory requirements. Maintained strong relationships with government agencies, leading to the renewal of contracts and additional project opportunities.

2006- 2017

Sea View Landscaping I Ajman, UAE

### Agriculture Engineer

Oversaw a wide spectrum of landscaping projects, providing strategic direction and ensuring successful project outcomes. Streamlined operational processes, resulting in a more than 15% improvement in efficiency. Conducted thorough cost analyses, contributing to improved financial performance. Conducted meticulous field inspections to ensure adherence to quality standards and project specifications. Implemented rigorous quality assurance processes, resulting in a 15% reduction in project defects. Developed and delivered comprehensive project status reports, enhancing transparency and enabling informed decision-making.

### Internship

Mar 2003 - Aug 2003

Habib Bank Limited I Faisalabad, Pakistan

#### Internee

Completed a 6 months internship Program with Habib Bank Limited Import/Export documentation department. Concluded with internship report and presentation.

### Short Course

Dec 2003

University of Agriculture I Faisalabad, Pakistan

#### Principles of Experimental Design & Analysis

Completed a 1 months EU Asia Link Project short course on "Principles of Experimental Design & Analysis". It was organized by collaboration of University of Agriculture, Faisalabad and University of Wales, Bangor, UK. It was conducted by Dr. Philip Hollington

## Projects

**Portfolio:** — It's a portfolio of my skills and projects. I'm proficient in JavaScript, React, Ruby on Rails, and PostgreSQL for Backend and Frontend. I use Bootstrap for sleek UI designs and efficient user experiences. Built with: React, Redux.

**Motorcycle Booking Web Application:** — A web app for easy motorcycle showroom. Users can securely sign up and log in, view and reserve motorcycles, track reservations and usage. Built with: Rails, React/Redux, PostgreSQL.

**Weather App:** — A web app for weather data. Users can view real-time and forecast data, track and compare trends, explore regions and locations. Built with: React, Redux.

**Fusion-Bites:** — This is a web portal for restaurants, it uses free API data to fetch food items. It included likes and comments buttons. Built with: HTML, JavaScript, CSS, API, LocalStorage.

**Math Magician:** — A simple web calculator and a display of "random quotes" fetched from an external API alongside your calculator. Built with: React, HTML, JavaScript, CSS, API, LocalStorage.

**Leaderboard:** — The leaderboard website displays scores submitted by different players. It also allows you to submit your score. All data is preserved thanks to the external leaderboard.

**Book Store:** — Our website allows you to: Add books to your personal library. Update the percentage of each book that you have read. Delete books from your library. Add new books to our catalog. Built with: HTML, JavaScript, CSS, API, LocalStorage.
